Last Updated Sunday, 14 September 2008

Our aim is to serve as a resource for people looking for flat share or rooms to rent as well as people looking to let their rooms, flats, apartments or houses. Although its primarily aimed at the renting/letting segment but you can also list your properties for sale as well. Please note that all the services at the moment are free.

So please spread the word around and make your website a useful website for everyone. In order to add a listing please register free from the register link at the left of this page and then log in.

Once you have logged in you can search for a room, flat share, apartment or house to rent, if you do not find anything suitable at the moment, then please register your requirements with us. We'll then notify you via email when something matching your requirements becomes available - and we can list your property requirements on our 'Properties Wanted' page. Properties are always coming on the market, so beat other renters/buyers to the BEST new listings.

Please note that even if your country, state, post code or locality is not already listed under the search options, you can add it once you register and sign in. If you face any problems please contact us through the contact us page.
